POND. 1627.

A New Almanacke for the Yeare of our LORD CHRIST 1627.

Beeing the third after the Leape Yeare.

Wherein are inserted many things of speciall note, and necessarie use, never heretofore written by any: As also a plaine and perfect Almanacke, for more then two thousand yeares from the Nativitie of CHRIST. Shewing for every Yeare, past, present, or to come, all things which are usually contained in a yearely Almanacke.

Calculated by EDVV. POND,
For the Auncient Burrough-Towne of
STANFORD.

These lines be short, yet finde you shall,
The Termes of Law perpetuall.

First of *Hillarie* Terme shall be,
Ianuary the twenty three:
In the twelfth of *February*,
Terme doth end most certainly.
After Terme from Easter day
Wednesday fortnight 'gins alway:
Till th' *Ascention* day be past,
Munday next this Term doth last.

Friday after *Trinitie*,
Terme begins assuredly:
As our Lawyers all doe write,
Ends the Wednesday fortnight.
Michaelmas-Terme you seek to find
Ninth of *October* have in minde:
Ends as I doe well remember,
Twenty eighth day of *November*.

The proportion of the pound Avoir-du-pois to the pound Troy, is as 60. to 73. so that 60. pound Avoir du-pois are equall to 73. pound Troy. The proportion of the ounce Troy to the ounce Avoir du-pois, is as 73. to 80. so that 73. ounces Troy, are equal to 80. ounces Avoir-du-pois. Therefore the pound Avoir-du pois is greater then the pound Troy: and the ounce Troy is greater then the ounce Avoir-du-pois.

Wheate at 5. shillings the Bushell or Stryke, the Towne-Bakers penny white, is (by Troy) 7. ounces, 7. penny weight: by Avoir-du-pois 8. ounces: And the Country-Bakers penny white (by Troy) 7. ounces 13. penny weight: by Avoir-du-pois 8. ounces and one quarter. If the Baker want one ounce in 36. ounces of this Assize, he shall suffer the Pillorie, without any

A briefe Computation of times memorable.

whose Raigne over vs, wee pray God in his mercie long to continue.

¶ To know the time of the Tyde or full Sea, in all the Ports and Havens here undernamed, being 16 Numbers one Hundred.

FIrst, for the day you desire, finde the age of the Moone in the 4. Commune of the first page of every Month (where you see these Characters placed ✱ ☽) then with the same age returne to this Table, and descend with your eye right downe wards on the left hand you shall finde the name of the place you seeke for (or the number of the line where you shall finde it on this side) and in the common Angle, where those two meete, (viz.) the age of the Moone, and the name of the Haven, there have you the houre in the upper line, and the minutes past in the neather line, which is the time of the Tyde there. As for Example.

I desire to know the time of Tyde at Lin, the viij. day of January this yeare 1597. I finde her age ten dayes, which ten I finde in the head of this Table, and right under tenne against Lin, I finde 2. hour. 0. minu. for the I conclude, it is full Sea at Lin, the viij day of January at 2. of the clocke, 0. min. and so that I find Lin on this side of the leafe in the line numbred with 9 I say it is at the same time high water at Lin, Humber, Weymouth, Plimmouth, Antwerp, &c. And in like manner every line hath to all the Havens therein named, the same time, that the first Haven in the same line hath.

The names of the Havens.

1 Orinborow, Southampton, Portsmouth, Wellins, The Spits, Fland. Land end.
2 Aberden, Redban, Rochester, Maldon, West end of Nore.
3 Graues end, Downes, Romney, Tower, Rankins
4 Dundee, S. Andrewes, Lysborne, Silly, Maze, S. Lucas, Spaine
5 London, Tinmouth, Hartlepoole, Amsterdam, Gatgoine, Brittaine.
6 Barwicke, Gatsend, Scarborough, Mount Flamborow, Fausning, Blankenb
7 Frith, Leith, Dunbar, Lawr, Blow, Monsh. Egmo. (zar, Waterford, Malo.
8 Falmouth, Foy, Bourne, Garnsey, Severn-mouth, Tinby, Torbay, Kinsale, Li-
9 Lin, Humber, Waymouth, Plimmouth, Antwerp, Beaurd, Dortmouth.
10 Bristol, Lanion, Foulnesse
11 Milford, Bridg-water, North-coast, Taxel, Exwater.
12 Portland, Peterpoint, Harefine, the Hague, Blanch. Sherb.
13 Orkney poole, Orwell, S. Hellen, Flee, Eames, Embden.
14 Needles, Deepe, Casker, Lux, Lenow, Orford, Layston.
15 Yarmouth, Bullcine, Dover, Harwich, Wight.
16 Rye, Callice, Calshot, Winchel, Gorend, Thames.

The olde Romane Kalender, of *Kalend: Nones*, and *Ides*, in use for Histo-rians.

The dayes increase, frō the shortest to the longest.

● New Moon 7 day, 6 min. past 10 Noone.
☽ First Quar. 14 day, 45 min. past 9 Morn.
○ Full Moon 21 day, 50 min. past 9 Morn.
☾ Last Quar. 29 day, 28 min. past 9 Morn.

As in this Moneth, so in all, you may see the houre and minute of the Sunnes setting, and the quantity of every daies increase or decrease under their Titles.

The first day in length 9 hour. 24 min.

If from the *North* the winde begins to blowe,
In Summer drought, in Winter looke for Snowe;
In Spring and Autumne, ayre cold, yet faire,
Preserving health by cleansing of the Aire.

The first day hath 11 hour. 16 min.

The biting blasts from *Boreas* now blowing,
For bids the husbandman then to bee sowing;
The seede it hurts with bitter cold and drying,
And all young fruits in danger are of dying.

The first day hath 13 hour. 28 min.

What *Aquilon* hath done by cold and drought,
Now *Hellespontus* heate will bring about.
What heate, *North-East by East*? we feele it not:
But try th' effects, and then you'l say 'tis hot.

The first day hath 12 hour. 48 min.

South-west-by South, cal'd *Austro Aphricus*,
More temperate heate it bringeth unto us;
The winde and sunne both in that place together,
Expect naught else, but wet and rainie weather.

The first day hath 8 hour. 46 min.

Aphricus, or *Lybs*; *South-West* and by *West*,
Of both, the former I account the best;
Though it bee cold and moist, and causeth raine,
Yet short's the time a shower doth remaine.

The use of this Table in Example.

Queen *Elizabeth* began her Raigne in the yeare of Christ 1558 Novem. 17. She raigned 44 yeares, 4 mon. and 15 daies. And it is since She began her Raigne, 69 yeares compleat the 17 of Novemb. this yeare present, 1627. Now to know the time since the end of her Raigne, see her name on the right hand, and you find there 24. yeares since she died, March 24.

The Description of the foure Quarters of the Yeare 1627.

The Winter Quarter

THe Winter Quarter (according to the motion of the Sunne) began the 11 day of December in the last yeare (viz.) 1626: The Sunne then entring into the first minute of Capricorne, having then his greatest South declination from the Equinoctiall line, (viz.) 23 degrees and a halfe, beeing then at his noone 47 degrees more Southerly from us, then hee will bee the 2 of June: by reason whereof, the dayes are with us now at the shortest: and from this time to the 2 of June they will increase houres and minutes, as in the blanke page in every moneth for every day you may behold.

The Spring Quarter.

THe Spring time is accounted to beginne the 11 day of March this yeare 1627; The Sunne then entring into the first pointe of Aries, at which time the artificiall Day and Night are both of one equall length in all parts of the World.

The Summer Quarter.

THe 12 of June the Sunne entreth into the first Solsticiall pointe of Cancer, beginning then our Summer: The Sunne beginning then to decline from us, all plants and fruits then begin to cease their growth, and decline towards a ripening. From this time to the 11 of December, the Dayes decrease, and the Nights increase

The Autumnall or Harvest Quarter.

THe 13 day of September the Sunne entreth into the Autumnall Equinoctiall point, making againe the Day and Night of one equall length. This Quarter continueth untill the 12 day of December.

¶ The use of all the former Tables followeth: viz.

FIrst, by the first Table, to finde the Golden Number, the Dominicall Letter, and Leape yeare, for any time past, present, or to come

2 By the second Table, to finde the number of weekes and dayes from Christmas to Shroveunday; and what day of the Moneth Shroveſunday, Easterday, Rogation, Whitſunday, Advent, and all other Moveable Feasts doe fall for ever, &c.

3 By the third Table, to finde the place of the Sunne for every day. The Change, Full, and Quarter of the Moon, with her Age, and consequently the time of the Tyde, or Full Sea in all Havens upon any day for ever.

4 By the fourth Table, to finde in what Signe and Degree of the same the Moone moveth in every day for ever.

Lastly, hereunto is added, a Rule or certaine direction to finde upon what day of the Weeke any Feast day doth fall, the Termes of Law and their Returnes.

All these before specified, to bee found with facilitie for any time since the Nativitie of Christ, and so forwards, untill the ende of the World

¶ *The first Rule for the first Table.*

In the head of the first Table finde the yeare of our Lord (as neere as therett is to bee found) going before that yeare in which you desire, and the first upright number of the Table, directly under the yeare found betwixt the two lines crossing the Table marked thus **, is the Golden number; and the Dominicall Letter on the left hand, for the yeare, found in the head. But for the yeare propounded account how many yeares it is more then the yeare found in the head of the Table; for which number of yeares exceeding, looke downewards in the first Columne on the left hand, and where it falleth you have the Dominicall Letter; and in the same line, directly under the yeare first found, you have the Golden Num. for your desired yeare. An example will make it plaine.

1 *Example.*

This yeare, 1627. I leese to know the Dominicall Letter and Golden Num and I cannot finde 27 in the head of the Table: But I finde 1625 which wanteth two yeares of my desired yeare, (viz.) 1627; therefore I looke in the first Columne on the left hand, under this Title, be yeares to be added; and there I finde it to be the third after Leape yeare, the Dominicall Letter G and in the same line (in the common angle) direcly under 1625, the yeare first found, I finde the Golden Number 13.

2 *Example.*

For the 34 yeare of Christ, which 34 I cannot finde in the head o the Table: but I finde the 29 yeare, which wanteth five yeares of 34; therefore I take the number 5 in the first side (of yeares to be added,) and there I finde it the second after Leape yeare, the Dominicall Letter to be F, and the Golden Number in the same line right under 29 (first found) to be 16, in the 34 yeare of Christ.

3 *Example.*

For a time to come (viz.) 1948, which yeare I cannot find in the head of the Table; but I finde 1625, which is lesser then 1638 by 13 yeares: therefore I take the line numbred 13, (as I did before) and I finde it to be the second after Leap yeare, the Dominicall Letter G, and the Golden Number 5, in the yeare 1638.

The use of the former Rule and Example.

By the second Table to finde the Mooveable Feasts; The Rule is this When you have found the Dominicall Letter and Golden Number by the first Table, see where you finde the same againe in the second Table, and in the same line you shall plainly see the Mooveable Feasts for that yeare, &c.

1 *Example.*

This yeare 1627, by the first example of the first Table, I found the Dominicall Letter G, and the Golden Number 13, wherewith I enter the second Table, and where I finde G in

the margine, I find 13 in the upper line of that space. In which line forwards I see from Christmas to Shrovesunday 5 weeks and 6 daies, Shrovesund Febr. 4, Easter day Marc. 25. Rogation-sund April 20, Whitsund. May 12, and Adventsund. Decemb 2. And upon the same daies they doe fall, whensoever the Dom. Letter is G, and the Gold. numb. either 5, 13, or 16.

2 Example.

In the 34 yeare of Christ (by the second Example of the first Table) I found the Dominicall Letter E, and the Gold. Numb. 18: but in the second Table in the space of C, I finde 16 in the first line: therefore I conclude in the 34 yeare of Christ, betwixt Christmas and Shrovesunday was 6 weeks, 2 dayes. Shrovesunday the 7 of Februar. Easter day the 28 of March, Rogation-sunday the 2 of May, Whit-sunday the 16 of May, and Advent Sund the 28 of November.

All the other Moveable Feasts are these (viz.

1 Septuagesima-sund. the same day fortnight before Shrovesun.
2 Sexagesima is the same day seven-night.
3 Quinquagesima is Shrovesunday.
4 Quadragesima is the next Sunday after Shrovesunday.
5 Palme-Sunday is the next Sunday before Easter.
6 Lowe Sunday is the next Sunday after Easter.
7 Ascention day is the next Thursday after Rogation Sunday.
8 Trinitie is the next Sunday after Whitsunday.
9 Corpus Christi is the next Thursday after Trinity Sunday.

An Exception.

In any Leape yeare (if Shrovesunday fall before the 25 of February) you seeke to know the time from Christmas to Shrovesunday, or on what day Shrovesunday falleth, you must take the first of the two letters. As for Example.

The next yeare 1628 (being Leape yeare,) you shall finde F Dominicall Letter untill the 25 of February, and then E the rest of that yeare; and the Golden Number the whole yeare 15: Therefore (as you see in the second Table) from Christmas to Shrove-Sunday 8 weekes and 5 daies; And Shrovesunday the 24 of February, then forward to be E, and so shall you finde Easter day to be the 13 of April.

The

The use of the Third Table.

By the third Table (as in the Title thereof appeareth) you may finde in what Signe and degree, the Sunne is in every day. The Change Full and Quartiles of the Moone, with her Age: And so consequently, the Tides, in all Havens for ever. The Rule is plaine.

Under this Character ☉ in every Moneth (and upon every Day noted on the left side) you have the Signe, and Degree the Sunne is in. And under this Character ☾, you have the Golden Number, set upon that day wherein the Moone changeth.

Example.

This yeare 1627, (the Golden Number being 13) to know the Change in January, I find 13 upon the 7 day. Therefore I say, the Moone changeth this yeare the 7 of January; And the Sunne that day is in the 27 degree of ♑ Capricorne.

To finde the Full Moone & Quartiles.

According to the Equall, or Meane motion of the Moone account from her Change, 7 dayes 9 hou. to her first Quartile, 14 dayes 18 houres to her Full, and 22 dayes 3 houres to her last Quartile.

To finde the Tides, for ever.

First finde her Age, then with the same turne to any Tide table, you have your desire.

The Rule to finde where the Signe is for ever.

First finde the Age of the Moone, then with the same Age enter the fourth table under this Title, Motus ☾, and against the number of that Age, you finde how many Signes and Degrees you must adde unto the place of the Sunne that day. And when the whole number of Signes make 12 (or above) cast 12 away, and take the remainder: And when the Degrees put together make up 30, or above, then account 30 Degrees for one Signe.

Example.

Example.

To know what Signe, and Degree, the Moone is in the 30 Day of March, this yeare 1627; First, I finde the Golden Number, which is 13, to be upon the 7 day, from thence accounting the daies downwards, I finde the Age of the Moon, the 30 day to be 23 dayes, and the Sunne, that day, to be in the first Signe ♈, 20 Degrees: Now with 23 (the Moones age) I enter the fourth Table (under Age of the ☾) and there against 23, I finde 9 Signes 6 Degrees to bee added to the place of the Sunne that Day (viz.) 1 Signe 20 Degrees.

9 Signes 6 degr.
1 Signe 20 degr.

both which put together, make the 10 Signe 26 deg. place of the Moone that day in the 26 Degree of the tenth Signe. which in the wide Space there you finde to be Capricornus.

The conclusion.

To know upon what day of the weeke any fixed Feast doth fall; Remember upon what letter the Feast day standeth in any Kalender, then (having found the Dominicall, which is the Sunday letter for that yeare) by this Table you may plainely see your desire.

Sunday.	A	B	C	D	E	F	G
Munday.	B	C	D	E	F	G	A
Tuesday	C	D	E	F	G	A	B
Wednesday	D	E	F	G	A	B	C
Thursday.	E	F	G	A	B	C	D
Fryday.	F	G	A	B	C	D	E
Saterday.	G	A	B	C	D	E	F

Example.

The Annuntiation falleth, ever upon Our Lady day; this yeare G is Dominicall Letter; Therefore the Annuntiation this yeare is Sunday. In the 34 yeare of Christ the Dominicall Letter was C. Therefore, as in this Table where you finde C in the Sunday Line, count directly downward, and there you finde C for Sunday, and D for Munday, E Tuesday, F Wednesday, and G Thursday, &c.

An Exception.

For the place of the Sunne, for every 114 yeares past, abate one Degree. For the Golden Number, for every 304 yeares past, set it one day forward.

¶ Astro-

¶ Astronomicall Elections, &c. breifely described for administration of Phisicke and Phlebotomy.

AS in all other parts of Physicke, so in Phlebotomie, or letting of blood, first skilfully and circumspectly is to bee considered and certainely knowne, the cause: As whether it bee needfull and good to the Patient, as that it be to purge the body of some unnaturall, naughty, & superfluous humour. For otherwise, letting of blood is very dangerous and openeth the way to many grievous infirmities: And note generally, that it is not convenient, either for a leane and weake man, or for a very fat and grosse man to bee let blood, neither for a childe under 14 yeares of age, nor an old man above 56.

Now ther remaineth to be considered, how it standeth with the Patient inwardly, for his complexion and age; and outwardly, for the time of the yeare, time of the day, and diet.

For the complexion: Let blood the { Phlegmatique, Melancholike, Cholericke, Sanguine, } { The Moone beeing in } { Aries or Sagitta. Libra or Aquar. Cancer or Pisces either of these. }

For his Age: let blood in his { Youth, from the change to the first quarter. Middle age, from the first quarter to the full. Elder age, from the full to the last quarter. Old age, from the last quarter to the change. }

¶ The time of the Yeare.

Spring good. Harvest indifferent.

¶ For the time of the Moneth.

Let not blood { The Moone in Taurus. Gem. Leo. Virg. or Capric. The day before, nor after the change and full. Twelve houres before and after the quartils. The Moone with Iupiter or Mars, evill aspected. }

¶ The time of the Day.

Morning after Sun rising, fasting: afternoon, after perfect digestion: the aire temperate, the winde not South.

¶ Diet

¶ Diet after Bleeding.

Sleepe not presently, stirre not violently.
Use no venery, feede thou warily.

Notwithstanding, for the Phrensie, the Pestilence, the Squinancy, the Pluriſie, the Apoplexe, a continuall headach growing of choler, or blood, a hot burning fever, or any other extreame paine, in this case a man may not tarry a chosen time, but incontinently, with all convenient speed, he is to seeke his remedie; but then blood is not to be let in so great a quantitie, as if a chosen time might be respected.

Good to { Prepare humors / Vomite / Purge by neezing / Take Glisters / Take Gargarisines / Stop rewmes and flux / Bath for cold diseases / Bath for hot diseases } the) in { Gem. Lib. or Aquar. / Aries, Tau. or Capric. / Can. Leo or Virgo. / Aries, Lib. or Scorp. / Cancer or Aries. / Tau. Virg. or Capric. / Aries, Leo, or Sagit. / Canc. Scor. or Pisc. }

Purge with { Electuaries, / Potions, / Pills, } the) in { Cancer. / Scorpio. / Pisces. }

The opinion of *William Bullein.*

Quamvis Medicina de se Scientia sit perfecta, Medicus tamen in opere suo sine Astrologia non est perfectus.

Although Physicke is a perfect science of it selfe, yet a Physitian cannot be perfect in his worke without Astrology.

For that in us all things may vaine appeare,
A Veine we have for each day in the yeare.

Bones, Veines, Teeth } *in a Man perfect in his Bodie* { 217. / 365. / 32.

¶ Briefe

¶ Briefe Rules of Husbandry.

Plant and graft, the Moone increasing, in Taur. Aquarius; the winde not Easterly.
Fell timber from Midsommer till Christmas, the Moone increasing.
Fell Coppice and Fewell, the Moone in the first quarter.
Cut your vines in February, or March.
Geld Cattell the Moone in Aries, Sagittarius, or Capricor.
Remoove trees, the Moone at the last quarter in November.
Shearе sheepe, and cut the haire to growe, the Moone increasing.

To keepe thy haire safely from falling untimely,
Hot scalding Bathes deny, hate wanton company:
Abstaine from venery, purge choler warily,
Let thee blood needefully, surfet not willingly.

The ANATOMIE of MAN.

THe *Braine* remembreth good and ill,
The *Liver* loveth all.
The *Forehead* understandeth still,
And wrath breeds in the *Gall.*
The *Lungs* give forth both breath and voice,
The *Heart* Gold strives to get.
The *Spleene* doth make us to rejoyce,
And Thought the *Heart* doth frett.
The *Blood* the body doth keepe in kinde,
The kinde rests in the *Soule.*
The Spirit eke doth rule the *Minde*,
And *Minde* doth *Heart* controule.
So *Faith* in *Heart* must alwaies dwell,
And *Christ* in *Faith* or *Soule* in *Hell.*

The

¶ The use of these five Tables following, by *Ed. Pond, at the rate of* 8 *in the* 100.

The first Table sheweth the yearely Interest of any Summe, from one shilling and upwards, unto 1000000 pounds, either by pen or counters, onely by addition.

Example. For the use of 17 pounds and 17 shillings: by this Table I see that the yearely use of 10 pounds, is 16 shillings; and of 7 pounds is 11 shillings, 2 pence 2 qu: and 17 shillings is one shilling 4 pence. all these added together, make 1 pound, 8 shillings, 6 pence halfepeny

The second Table sheweth what any Summe put out for any terme under 31 yeares will bee in the end, accounting interest, and interest upon interest, &c.

Example. One pound, put out for 30 yeares, is worth 10 pound, 1 shill. 4 pence qu to be paid at the end of 30 yeares.

The third Table sheweth what any Summe due to bee paid at any terme of yeares under 31, is worth ready money,

Example. One pound due to bee paid at the end of 10 years, is worth ready money one shil. 1 pence, halfpeny, farthing.

The fourth Table sheweth what any Summe being an annuitie or yearely rent to endure any tearme of yeares will be worth: all to bee paid at the ende.

Example. One pound Annuitie yearely due to bee paid, during the terme of 30 yeares, and all for ought until then, will be then worth 113 pounds, 5 shil 6 pence halfepenny.

The fifth Table sheweth what any summe, being an annuitie or yearely rent, to endure any terme of yeares, or a leale for any terme of yeares to come under 31, is worth readie money, the cleare yearely rent being knowne.

Example. A leale or annuitie of one pound yearely to be paid during 30 yeares, is worth in ready money 11 pound, 5 shillings, one peny, 3 farthings.

A ſpeciall note and generall rule.

In every of theſe 5 Tables, whenſoever your queſtion is of a greater ſumme then is therein contained, doe but (with your pen or counters) lay downe the ſumme found in the Table ſo often as will make up the Summe propounded.

Example. By the former example of the ſecond Table, where one pound in 30 yeares, is worth 10 pounds, one ſhil. 4 pence farthing; thereby appeareth, that 5 pounds ſhall be worth 5 times ſo much, and 10 pounds, worth 10 times as much as one pound is worth, (viz.) 100 pounds, 13 ſhillings, ſixe pence halfe-peny.

FINIS.
